Zionsville, IN 46077

Attn: Steve Flecker

Steve:

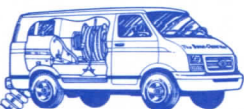

We have been using the Enviro-Save Engine & Powertrain Protection Metal Treatment in our Chevy 1 ton service vans for almost a year now and have found that the claims made are true.

Since installing Enviro-Save we have realized an overall fuel savings of 10% and have noticed a marked improvement on the operational side. Our vans carry 2500 pounds of water plus equipment and now have more available power and shift gears much more smoothly.

Without reservation, I am happy to recommend Enviro-Save and do so whenever the opportunity arises.

Donald A. Bank, Vice Pres, Operations.
