To whom it may concern:

Re: Enviro Save Products

We tried the product on a fleet truck with 1.1 million kilometers of service. The driver told us that the transmission, oil and coolant temperatures had dropped. During a hard pull on the Coquihalla Hwy. the transmission and engine oil temperature dropped 30 degrees and the coolant temperature dropped 15 degrees. The Enviro Save product is very good and I would recommend it to others. We will continue to use this product in all of our equipment.

Thanks Enviro-Save for a product that actually does what it is supposed to do.

Regards,
