

Coquitlam TOWING and Storage Company Ltd.

218 Cayer Street, Coquitlam, B.C. V3K 5B1

TO WHOM IT MAY CONCERN:

In early 1990 I was introduced to ENVIRO SAVE metal treatment products.

At first, I was reluctant to try the product, but after reading testimonials from people I respected in the industry, I decided to test the product.

After treating the first truck, we noticed a remarkable difference in performance and temperature drop. The new standard transmission that came with these new trucks are five speeds with ATF, PTO'S and HYDRAULIC PUMPS. These transmissions did not hold up to the task! With repeated bearing & syncro failures, I treated the transmissions with ENVIRO SAVE and had great **SUCCESS**.

We received a new three ton diesel truck which I treated and a year later received another which I didn't treat. The one I treated lasted a lot longer with fewer problems. The newer truck was sold with less miles and a blown engine.

On a personal note; I have a 1976 Chev Pickup which I use to carry an eleven foot camper. I drive this truck every day a minimum 50 km a day and it has 310 thousand miles on it and still going strong. So if you have the opportunity to try ENVIRO SAVE, I suggest you do!! You will not be disappointed.

If you wish to ask me anything, do not hesitate to call me at 939-6474

Yours truly,

GORDON LUNT
