Dear Warren Casperson :

I'm writing this letter to share the incredible results I experienced using your products on the 2 vehicles I depend on most. I first tried the crankcase treatment and fuel top-up only on my 1994 GMC Z71 4x4 in November, 2001 with an odometer reading of 197,000 km's. This is my workhorse that I use daily for my business and I'm constantly pulling a loaded trailer full of equipment and supplies. I noticed the results immediately after treating the engine. I felt regained power that I just accepted wasn't there anymore. It pulls the trailer with more ease, and seemingly less strain on the engine. My fuel mileage has definitely increased but I'm also idling for hours at a time so my mileage figures are somewhat deceiving. There is no question that I will do the rest of the powertrain with the required treatments. This stuff is incredible and IT REALLY WORKS!!

My second vehicle that I treated just weeks ago in January, 2002, is a 1999 Toyota Tacoma TRD SR5 4x4 ext. cab p/u truck. The V6 engine had 70,000 km at the time I treated the entire power train with one of your Powertrain Protection Kits. Again I experienced more amazing results, and immediately after the treatment was applied. I first noticed a definite smoothness in the shifting which feels real good, especially on cold mornings when you first take off. I also noticed some great improvement in performance and in my fuel mileage. Before I treated the truck I was averaging 400 - 425 km per tank of fuel, and since the treatment I have been getting between 500 - 525 km's per tank. WOW!! That saves me about 1 tank per month which translates into about \$40.00 - \$50.00. Even with a newer model truck I will now save \$600.00 this year alone in fuel. I am truly impressed with Enviro-SAVE products and I will preach the good news about these products to everyone I know.

Thanks for developing such a great product that truly does provide the world with an alternative that is very affordable and cost effective. I know I'm doing my part to help now.

Sincerely,

Mark Dietrich
President
