Re: Enviro-Save

Dear Steve,

I am writing today to inform you of how the Enviro-Save Metal Treatment product has worked in my vehicle. Since I placed it in my vehicle I have noticed a 20% increase in fuel economy. Keep in mind my vehicle has 215,000 miles on it. It is not only my daily driver but a back up delivery vehicle as well. We had an occasion where a driver had to make deliveries throughout the northern Indiana and central Illinois areas. He drove this van pretty much nonstop for 30 hours without missing a beat. Driving 1,000 miles within that time frame is brutal on a normal engine, let alone on an engine with as many miles as this one. Before I introduced the Enviro-Save to the vehicle there was always a noticeable odor of burning oil when sitting still. Now the odor has disappeared. I have noticed a considerable increase in horsepower as well. I have to carry a wrench in the van in case the belt is pulled off the tension pulley again. As a business owner the only control I have is my cost and by utilizing this product it has saved me hundreds of dollars so far in my fuel budget. My only regret with Enviro-Save is that I didn't put it in my van sooner.

Steve, you have made a believer out of me and my only hurdle now is convincing others to follow in my footsteps.

Respectfully,

Gregory A. Mertz
President
