

June 4, 2002

On behalf of Harding Motorsports we would like to thank Envirosave for their continued support of our race team.

Envirosave wheel bearing grease is an excellent product. In the past Harding Motorsports had to repack the bearings every race or two. Now thanks to this great product we only have to repack every 4th or 5th race, and only then because it's dirty. We have never had a breakdown due to the bearing failure.

Harding Motorsports resealed differentials 2 or 3 times a year. But since using Envirosave product we now only have to rebuild once a year. Envirosave helps to keep our differential running cooler and reduces wear on the seals making them last longer.

We have been using Envirosave products since 1988 and will continue to use them throughout our racing careers.

Sincerely

Peter Harding
