Re: Enviro-Save

Dear Steve:

Just thought I would drop you a line and tell you what has happened since I installed the Enviro-Save Engine & Powertrain Protection Metal Treatment in my 2007 Ford F350 diesel.

As you will recall, I was getting terrible fuel mileage and had installed several different computer chips that were supposed to increase my fuel mileage. These chips cost about \$400 each and none of them did me any good at all. No matter what I did, I could not get better than 13 MPG. Luckily, I was able to get my money back on those.

I was so unhappy with the mileage I was getting I bought a 2008 Ford F-150, 6 cylinder just to lower my operating costs.

When you first approached me with Enviro-Save I couldn't have been more skeptical. You convinced me and I gave it a shot. My MPG shot up to 16.1 MPG on the highway and I am getting 15 MPG city/highway. Enviro Save has already paid for itself. The truck has more power and runs smoother than ever.

Since putting it in the F-150 I am enjoying increased fuel savings as well.

Thank you for bringing Enviro-Save to my attention and I highly recommend it.

Sincerely,

Tim McGovern
President

P.S. My 2 boats are up for the winter. I will want your product in them in the spring.
