

February 20, 2001

Mr. Kazuo Hanawa,
Envrio-Save Products Inc.,
#12 - 7675 Edmonds Street,
Burnaby, B.C. V3N 1B7

Dear Mr. Hanawa;

I wanted to let you know what I have noticed since treating my 1981 Volvo with Enviro-Save products. I have driven my car to many places in Canada and the USA and it is getting close to having 300,000 original kilometers on it.

Prior to treating the engine with Enviro-Save, it was using oil and I was getting 8.7 km's per liter of gas, which was mostly highway driving. On November 15, 2000, my car had 291,645 kilometers on it when I treated the engine. I immediately noticed that the engine ran smoother and it stopped using oil.

On January 11, 2001 I treated the transmission system. My car is now running very smoothly and I am getting 9.5 km's per liter of gas for highway and city driving, 50/50. My Volvo has 294,598 km's on it now.

I am rather impressed with the results and very happy to have the engine working like a new one. I feel it will give me another 20 years of driving.

Sincerely,

Miyako Sawada
