Dear Warren

Re : Enviro Save products

We first tried your products back in 1987, on our new 1987 F250 Ford, with a 460 motor. The first thing we noticed was that we used less gas pedal to get the same RPM. Plus our gas mileage improved. Once down south on a steep climb towing a 28 Ft. fifth wheel we passed a Semi, when we reached the top and pulled into a rest stop, the semi followed us in. He then asked us what we had under the hood, he could not believe the power we had. Because he had the same truck, but not the same power. We sold the truck 6 years ago with over 190,000 km on it and guaranteed it for a year. He could not believe the power this truck had. As we live in the same town we get to see him now and again. This truck now has over 300,000 km. Same motor, same transmission and still does not burn any oil. Still going strong. We have since used it in a 1986 E 350 460 Class C motor home, with the same results. Lots of power better gas mileage and does not burn oil, and we still own it. We then used it in a 1986 Buick 4 cyl. with 180,000 km. when sold. A 1992 Buick Century 6 cyl. with the same results. This car we sold to our next door neighbor with no worries . 210,000 km. when sold. We now have it in a 2005 Buick Century 6 cyl. knowing we will again be Happy Happy.

Yours truly;

Ossie & Gale O'Connor

Ps. Thanks once again for seeing us on a Saturday. It was greatly appreciated.
