Zionsville, IN 46077

Dear Steve:

Just thought I would take a few minutes and let you know what the Enviro-Save Metal Treatment has done for my vehicles.

My company has a 2004 and 2005 Dodge 2500 Cummins, a 2003 Dodge 1500 gas 4X4 and a 2005 Dodge Dakota, gas 4X4.

On both 2500's we have Allison heavy duty transmissions and one of the first things we noticed was how much smoother they shifted. Both vehicles are running much quieter and smoother and have more power. The '04 2500 has over 300,000 miles on it and is running better than ever. Both diesels are also giving us a consistent 10 to 13% more miles per gallon depending on load and driving conditions.

The '03 Dodge 1500 is up 2 miles per gallon and the Dakota is up over 2 miles per gallon and these readings have remained consistent since installation. Both vehicles have more power and run smoother than ever.

There is no question that I will receive my investment back through fuel savings alone and the benefits of adding longevity to the vehicles will be measured over time.

I want you to know that I will be recommending the Enviro-Save product at every opportunity and you can feel free to use me as a reference.

Sincerely,

Thomas A. Green, President  
TAG Coatings Corp.
